The research provides detailed segmentation of the global atmospheric water generator market based on Application, Capacity, Type, and region. The report discusses segments and their sub-segments in detail with the help of tables and figures. Market players and investors can strategize according to the highest revenue-generating and fastest-growing segments mentioned in the report.

Based on type, the cooling condensation segment held the highest share in 2021, accounting for around 90% of the global atmospheric water generator market, and is expected to continue its leadership status during the forecast period. However, the wet desiccation segment is expected to register the highest CAGR of 15.8% from 2022 to 2031.

Based on capacity, the up to 60 liters segment accounted for the highest share in 2021, contributing to around half of the global atmospheric water generator market, and is expected to maintain its lead in terms of revenue during the forecast period. However, the 61-500 liters segment is expected to manifest the highest CAGR of 17.0% from 2022 to 2031.

Based on application, the non-residential segment accounted for the highest share in 2021, holding more than 90% of the global atmospheric water generator market, and is expected to continue its leadership status during the forecast period. However, the residential segment is

estimated to grow at the highest CAGR of 17.2% during the forecast period.
