Industry 4.0 development is one of the main factors driving the global 5G IoT market. Manufacturers are aggressively integrating cutting-edge technology into their operations and production facilities, including cloud computing & analytics, IoT, AI & machine learning, and manufacturing & IoT. Due to this, there is now a need for 5G technology with lower latency and faster bandwidth in order to utilize wearables, autonomous robotics, and virtual reality (VR) headsets. The Internet of Things has significantly increased thanks to 5G, which has also boosted the Industrial Revolution 4.0.
