

AP Technology Showcases Remote Check Processing and Printing to Banks and Financial Institutions at AFP 2024

Remote Check Printing from AP Technology Used by Bank Customers to Improve Security, Efficiency and to Close Business Deals More Swiftly

NASHVILLE, TN, UNITED STATES, October 21, 2024 /EINPresswire.com/ -- [AP Technology](https://www.einpresswire.com/ap-technology), a pioneer in providing secure business payment solutions to banks and financial institutions, will present its advanced [APSecure™](https://www.einpresswire.com/ap-technology) remote check issuance platform at the Association for Financial Professionals (AFP) 2024 conference. The event, held from October 20-23 in Nashville, Tennessee, will provide a platform for AP Technology to demonstrate how its cutting-edge, on-demand check payment solutions can help banks and credit unions meet evolving customer demands, including servicing areas where there are no branch locations.

The graphic features the AP Technology logo at the top left. The main title 'APSecure ROC' is prominently displayed in a large, bold, black font. Below it, the subtitle 'Remote On-Demand Official Check Printing Solution for Banks & Businesses' is written in a smaller, bold, black font. A key benefit is highlighted: 'Remote client requests, funding automation, and secure remote cashier check printing performed in 3 minutes or less!'. A blue button with the text 'LEARN MORE' is positioned below the text. At the bottom left, contact information is provided: an email icon followed by 'Sales@APTechnology.com' and a globe icon followed by 'www.APTechnology.com'. On the right side, there is a circular graphic with a red border containing various financial icons like a dollar sign, a bank building, a pie chart, a handshake, a gear, and a padlock, with a hand pointing at a screen in the center.

APSecure ROC by AP Technology

APSecure is designed to address the increasing need for secure, flexible, and efficient payment processing in both local and remote environments. It empowers financial institutions to issue various types of checks—including teller line checks, starter checks, and home equity line of credit (HELOC) checks—remotely, providing seamless, on-demand service to customers.

“Security, speed, compliance and convenience are recurring topics when discussing processing and issuing payments with our bank customers,” said Richard Love, CEO of AP Technology. “At AFP 2024, we are excited to showcase how APSecure is already helping banks and credit unions provide their customers with flexibility, automation, and secure on-demand payment capabilities wherever they are needed.”

One of APSecure's standout features is its configurable internal workflow controls, which enable institutions to securely extend official check processing to customers no matter where they are. The platform integrates effortlessly into existing core systems, allowing banks and credit unions to modernize their check issuance processes and comply with current regulatory requirements.

By streamlining payment workflows, APSecure enhances operational efficiency and provides a superior customer experience. Whether

institutions are issuing checks at the teller line or allowing customers to print official checks remotely, APSecure offers a scalable solution to meet diverse payment challenges.

“

Remote check printing is a strategic advantage for banks and a valuable tool for law firms, real estate offices, and other industries that rely on rapid, reliable, secure payment processes.”

Richard Love, CEO, AP Technology

In today's world where businesses are seeking more secure and swifter transactions, APSecure offers banks and credit unions the capability to extend remote check issuance services to customers, significantly reducing the need for in-person trips to bank branches. This innovation is especially beneficial for sectors like real estate, where time-sensitive transactions, such as closing deals, require expeditious and secure payment solutions.

"APSecure is a game-changer, offering unprecedented security, flexibility and accessibility to banks, to financial institutions, and to their customers," continued Love. "Our

[remote check printing](#) technology not only simplifies payment processes; it also provides clients with greater convenience while saving them time and money. Remote check printing is a strategic advantage for banks and a valuable tool for law firms, real estate, and other industries that rely on rapid, reliable, secure payment processes.”

Attendees to this week's AFP 2024 conference are invited to visit AP Technology at booth #628, where they can interact with product experts, explore customizable payment solutions, and learn how APSecure can help modernize their payment workflows. Visitors will also have the chance to win exciting prizes each day of the event.
