The global metal bonding adhesives market is expected to grow at a 7.5% CAGR from 2024 to 2032. It is expected to reach above USD 8.6 billion by 2032 from USD 4.2 billion in 2024. Metal bonding adhesives are typically high-performance glues or adhesives used for specific carved

workings or in woodwork. In addition to their primary use in heavy artwork and compositions, they are occasionally employed in jewelry and costume design. Cyanoacrylate is among the most well-known adhesives available. One of the most well-known and well-established types of adhesives that function as metal super glue is this one. They ensure that the bonding is

maintained for a long time in addition to bonding metals.
