Contraceptives Global Market Report 2024 : Market
Size, Trends, And Global Forecast 2024-2033

The contraceptives market has experienced significant growth in recent years, with its value expected to rise from \$26.2 billion in 2023 to \$28.25 billion in 2024, reflecting a compound annual growth rate (CAGR) of 7.8%. This growth during the historical period can be attributed to factors such as the introduction of the birth control pill, heightened awareness and education about contraception, legal and social changes that promote reproductive rights, global population control initiatives, and an increase in the use of generic and low-cost drugs and devices.

What Is The Estimated Market Size Of The [Global](#)

[Contraceptives Market](#) And Its Annual Growth Rate?

The contraceptives market is projected to see strong growth in the coming years, reaching \$38.02 billion by 2028, with a compound annual growth rate (CAGR) of 7.7%. This growth during the forecast period can be attributed to several factors, including an increased focus on male contraceptives, greater access to contraception in developing countries, the integration of digital health technologies in contraceptive solutions, rising demand for long-acting reversible contraceptives (LARCs), and improved accessibility to over-the-counter drugs through online platforms.

Growth Driver Of The Contraceptives Market

The increasing prevalence of sexually transmitted infections (STIs) is driving the demand for contraceptives. STIs are infections transmitted from one person to another through sexual contact, with the most common transmission occurring during anal, oral, and vaginal intercourse, as well as through other forms of close physical contact. Contraceptives are used to help manage the transmission of STIs such as herpes and HPV, particularly those spread through skin-to-skin contact.
