Asia-Pacific gas water heater market is expected to exhibit CAGR of 6.0% during 2022–2031.

A gas water heater, also known as heat exchanger, is a

heating device that uses energy from various external sources and transfers it to heat the water. Water heater comes in various types such as instant gas water heaters and storage gas water heaters.

Rapid development of industrialization, modernization, and spread of information through internet led to development of the tourism industry has created great demand for hot water in cold regions, which fuels demand for gas water heaters.

Expansion of production capacities, acquisition, partnership, and research & innovation in the water heater application are key development in the global gas water heater market trends.

Rapid urbanization and development of global regions in context with construction of new residential and commercial buildings and infrastructure are anticipated to fuel the gas water heater market growth globally.

Rise in electricity prices, high operating costs, and technical issues associated with electric water heaters are expected to drive growth of the global gas water heater industry.

Growth of the global gas water heater market is driven by factors such as inclination of consumers toward adoption of energy efficient systems, favorable government subsidies that encourage use of gas water heaters, surge in number of hospitals and hotels, and increase in population and improved infrastructure in rural areas.

Rise in disposable income of consumers, coupled with improved lifestyle significantly boosts the market. Furthermore, growth in concern among consumers regarding natural resources and energy is encouraging consumers to shift toward energy-efficient water heating systems.

By product type, the instant segment accounted for the largest gas water heater market share in 2021.

By installation type, the indoor gas water heater was the leading segment in 2021.

By fuel type, the natural gas segment was the highest revenue contributor in 2021.

By application type, the commercial segment was the highest revenue contributor in 2021.

COVID-19 analysis:

Building & construction activities across the globe were on hold during the pandemic period owing to strict measures of social distancing, lack of labor, and raw material supply disruptions. This further declined the growth of the market in 2020. Moreover, temporary shutdown of factories, manufacturing bases, and other processing industries hampered the growth of the gas water heater market. Thus, all these factors collectively led to decreased the global gas water heater market growth in 2020.
