Greenhouse horticulture is another name for protected cropping. Protected cropping involves the use of a greenhouse, glasshouse, shade house, or screen house. During this process, crops such as vegetables, fruits, and flowers are grown within or under shelter. The greenhouse provides crops with a controlled environment that protects them from harsh climatic conditions and pests. Furthermore, a controlled environment boosts crop yield, which is why greenhouses are becoming more popular in Africa, India, and the Middle East.

The report focuses on the global greenhouse horticulture market share, greenhouse horticulture market trends, and the major products & applications, where greenhouse horticulture is practiced. It further highlights numerous factors that influence the greenhouse horticulture market growth market growth, such as forecast, trends, drivers, restraints, opportunities, and roles of different key players that shape the market.
