Window Film Market Overview: Definition and Scope

A window film is a thin material applied to glass for purposes such as energy savings, glare reduction, decorative design, branding, daylighting, daylight redirection, and enhancing safety and security. Made from layers of polyester with reflective coatings, window film helps improve the performance of existing windows. When professionally installed, it blocks harmful ultraviolet (UV) rays, helping to slow the deterioration of interior furnishings, fabrics, and flooring while assisting homeowners and businesses in conserving energy.
