

AV-Comparatives Certified Enterprise Cybersecurity Solutions - EEP / EDR / XDR

Comprehensive testing of top cybersecurity solutions for businesses, highlighting robust protection, minimal false positives, and low system performance impact

INNSBRUCK, AUSTRIA, October 23, 2024 /EINPresswire.com/ -- [AV-Comparatives](#), the world-leading independent cybersecurity testing lab, has published its latest results from the Business Main-Test Series. These tests, conducted between August and September 2024, evaluated the protection, false alarms, and performance impact of enterprise-level cybersecurity solutions. The findings highlight the effectiveness and impact of leading security products in real-world scenarios, providing essential insights for CISOs and enterprise IT teams.

Key Findings: The Business Real-World Protection Test assessed the ability of 17 vendors to block malware and safeguard systems against infections. Additionally, the Malware Protection Test focused on detecting malicious files, while performance testing measured the system impact during daily business operations. Across all tests, the vendors demonstrated remarkable capabilities, ensuring high

SenseOn Platform with EPP
Sophos Intercept X Advanced
Trellix Endpoint Security (ENS)
VIPRE Endpoint Detection and Response
VMware Carbon Black Cloud Endpoint Standard

Details:

Bitdefender, Sophos, Cisco, and ESET all achieved exceptional scores, with Bitdefender delivering a flawless performance in both the Real-World Protection and Malware Protection tests.

Kaspersky, Trellix, VIPRE, and G Data also maintained strong protection rates with no false alarms on critical business software.

Avast, CrowdStrike, K7, and Microsoft demonstrated robust security features while maintaining a balance between protection and low system impact.

Other top performers include Elastic, NetSecurity, Rapid7, SenseOn, and VMware, all of which delivered competitive results, meeting or exceeding the high standards required for certification.

Across the board, these products ensured a high level of security for enterprise environments, with zero false positives on common business software. The tests were conducted under real-

world conditions to reflect the cybersecurity challenges and demands faced by modern enterprises.

Peter Stelzhammer, co-founder AV-Comparatives: "Our rigorous testing process highlights the high quality of enterprise security solutions available today. These products offer businesses both the strong protection they need and the performance they demand."

Call to Action: AV-Comparatives encourages enterprises and cybersecurity professionals to explore the full report, which is available at [AV-Comparatives.org](https://www.av-comparatives.org). To learn more about the best security solutions for your business, have a look at the PDF report.

About AV-Comparatives: AV-Comparatives is a globally recognized, independent organisation offering systematic testing to examine the efficacy of cybersecurity solutions. Using one of the most comprehensive and rigorous testing methodologies, AV-Comparatives provides businesses and consumers with unbiased, transparent, and reliable test results.
