

EBC Financial Group and University of Oxford Department of Economics Announce WERD Episode on Macroeconomics and Climate

EBC and the University of Oxford explore macroeconomic policies for climate resilience and sustainable growth in the WERD 2024-25 webinar series.

UNITED KINGDOM, October 23, 2024 /EINPresswire.com/ -- [EBC Financial Group \(EBC\)](#) is proud to announce its continued collaboration with the University of Oxford's Department of Economics for the 2024-2025 edition of the acclaimed "What Economists Really Do" (WERD) webinar series. The upcoming event will be the first WERD event to feature a dedicated panel discussion session in a hybrid setting, titled "Sustaining Sustainability: Balancing Economic Growth and Climate Resilience". It also marks the second collaboration between EBC and the University of Oxford's Department of Economics this year, following an earlier success in March. EBC's ongoing collaboration with the University of Oxford's Department of Economics builds on the success of their previous WERD webinar, which focused on The Economics of Tax Evasion. That session explored the impact of tax evasion on both global and local economies, highlighting the importance of financial literacy in addressing complex economic issues.

The hybrid event will take place on 14 November 2024 at the Sir Michael Dummett Lecture Theatre, Christ Church College, and will bring together prominent thought leaders to discuss the intersection of economic policies and environmental sustainability.

As global climate challenges intensify, this event comes at a critical time when the financial sector's role in fostering sustainable development is under increased scrutiny. In today's economic landscape, aligning financial strategies with environmental stewardship is essential.

The upcoming WERD event, sponsored by EBC Financial Group, will feature a keynote lecture by Professor Andrea Chiavari and a panel discussion on how macroeconomic policies can address environmental challenges while ensuring global economic stability.

Through sponsoring this upcoming WERD episode, EBC will shift its focus toward addressing the pressing issues of climate resilience and sustainable economic growth. The panel discussion will explore how macroeconomic policies can help address some of the world's most urgent environmental challenges while ensuring economic stability. This timely dialogue underscores EBC's commitment to fostering discussions on how financial markets can lead the charge in sustainability.

David Barrett, CEO of EBC Financial Group (UK) Ltd, expressed his enthusiasm for the ongoing collaboration: "We are excited to partner once more with the University of Oxford's Department of Economics for the second episode of the 'What Economists Really Do' webinar series for the 2024-2025 edition. This collaboration embodies our commitment to advancing academic research and addressing the pressing issue of climate change through macroeconomic perspectives. At EBC Financial Group, we believe in the power of strategic partnerships to drive meaningful change, and we are proud to support such an esteemed partner in a collective mission to shape a more sustainable future."

Banu Demir Pakel, session moderator and the Associate Head of External Engagement and Associate Professor of Economics, added: "We are pleased to welcome EBC Financial Group back to sponsor another special episode of 'What Economists Really Do' (WERD). In the previous WERD episode, we welcomed David Barrett, CEO of EBC Financial Group (UK) Ltd to discuss 'The Economics of Tax Evasion'—proving how invaluable industry insights can be to an academic discussion. On the basis of this success, we are looking forward to hosting a larger hybrid panel event with further guests from the industry, plus a keynote lecture from Professor Andrea Chiavari on the topic of 'Macroeconomics and Climate.' The Department of Economics is proud to facilitate thought-leadership discussions between academia and industry, and we are grateful for EBC's ongoing support. We look forward to a prosperous event."

The University of Oxford's Department of Economics is globally celebrated for its rigorous academic research and significant contributions to economic policy. Attendees will gain valuable insights into how macroeconomic principles can align with sustainable growth objectives, informed by perspectives from both academia and the financial sector. With discussions that bridge the gap between theory and practice, this event will provide a forward-looking view of how economic policies can uplift environmental resilience and ensure global economic stability. Participants will also hear from industry leaders about the practical steps businesses and institutions can and are taking to achieve sustainable growth.

Embracing a Broader Vision of Sustainable Development

EBC Financial Group's support for this initiative comes at a time of strategic global expansion. With a growing presence in key financial hubs such as London, Hong Kong, Tokyo, Singapore, and Sydney, as well as emerging markets in Southeast Asia, Latin America, Africa, and India, EBC is committed to empowering local markets with financial solutions that are both robust and sustainable. By engaging with leading academic institutions like the University of Oxford's

Department of Economics, EBC aims to strengthen its role as a catalyst for positive change in regions that are traditionally underserved by major financial institutions.

The proceeds from this year's WERD event will support the Department and its goal to produce leading research and world-class education. Registration for the event is now open, offering both in-person and online access to accommodate a global audience. To reserve your spot, please visit this link.
