Unlike other industry “rate alerts”, Uplist’s RECAPTURE™ accurately automates the entire refinance analysis process, helping loan officers capitalize on refinance opportunities in a fraction of the time.

Uplist RECAPTURE™ delivers a full suite of advanced features that go beyond basic refinance alerts:

amortization, and financial benefit calculations, saving loan officers 20-30 minutes per loan.

- **Automated Refinance Alerts:**

With a direct integration to the LO’s pricing, loan officers are notified when favorable refinance

opportunities arise.

- Scenario Planning:

The tool models potential savings for homeowners by analyzing various interest rates, closing costs, and payment options, enabling loan officers to present tailored, data-backed refinancing solutions.

- Customer Outreach Automation:

RECAPTURE™ builds the borrower presentation and writes a custom email, allowing loan officers to quickly engage clients with personalized refinance options, facilitating faster outreach.
