

# AMPT Introduces Emsculpt Neo: Non-Invasive Body Contouring Now Available in Savannah

*AMPT brings Emsculpt Neo to Savannah, offering a non-invasive solution for muscle toning and fat reduction, with no surgery or recovery time needed.*

SAVANNAH, GA, UNITED STATES, October 24, 2024 /EINPresswire.com/ -- AMPT, a renowned

Emsculpt Neo offers a game-changing approach to body contouring, helping clients achieve their fitness goals without surgery or downtime.”

*Ricky Aspen*

boutique personal training and wellness center, is pleased to announce the availability of [Emsculpt Neo](#), an innovative non-invasive body contouring technology, starting on October 15. Led by Ricky Aspen, this treatment offers clients an opportunity to enhance muscle tone and address stubborn fat areas without surgery or recovery time.

About Emsculpt Neo

Emsculpt Neo utilizes a combination of High-Intensity

Focused Electromagnetic (HIFEM) energy and radiofrequency (RF) technology, offering a comprehensive approach to body contouring. The technology is designed to aid in muscle strengthening and fat reduction in specific areas like the abdomen, thighs, buttocks, and arms—all in a 30-minute session.

## How Emsculpt Neo Works

During each session, the HIFEM energy induces muscle contractions, while RF technology heats fat cells, allowing the body to naturally process them over time. Sessions are quick, with clients able to return to their daily activities immediately after treatment.

Ideal for those with areas that are resistant to diet and exercise, Emsculpt Neo provides an efficient, non-invasive option for body contouring. Individuals who are looking to improve muscle tone or reduce fat in targeted areas may find it a suitable treatment.

## Pricing and Payment Options

Emsculpt Neo treatments will be available at AMPT starting October 15. The cost of treatment will vary depending on the number of sessions and the areas being targeted. During an initial consultation, the AMPT team will provide clients with a personalized treatment plan that includes pricing information and potential payment options.

Additionally, Health Savings Accounts (HSA) and Flexible Spending Accounts (FSA) may cover a portion of the treatment costs for clients who have qualifying medical conditions, such as chronic back pain or weak pelvic muscles.

### Why Choose AMPT?
