

Surgical Scissors Market Size Reach USD 437 million by 2027 | Registering a CAGR of 3.5%

PORTLAND, HI, UNITED STATES, October 24, 2024 /EINPresswire.com/ -- the global [surgical scissors market](#) accounted for \$331.46 million in 2019, and is projected to reach \$436.70 million by 2027, growing at a CAGR of 3.5% from 2019 to 2027.

Increase in number of surgical procedures, rise in adoption of minimally-invasive surgical procedures, and surge in geriatric populations that suffer from chronic diseases drive the growth of the global surgical scissors market. However, risk of surgery-associated infection hampers the market growth. On the contrary, untapped market in developing countries are expected to create lucrative opportunities for the market players in the future.

The surgical scissors market can be segmented in various ways based on different factors, such as product type, material type, end-user, and geography.

Product Type: Surgical scissors can be classified into various types based on their intended use, such as:

- Operating scissors
- Mayo scissors
- Metzenbaum scissors
- Tenotomy scissors
- Stitch scissors
- Bandage scissors
- Iris scissors
- Curved scissors
- Straight scissors
- Micro scissors

Material Type: Surgical scissors can be made of different materials, such as stainless steel, tungsten carbide, and titanium.

End-user: The surgical scissors market can also be segmented based on the end-user, such as:

Hospitals and clinics
Ambulatory surgical centers
Research and academic institutes
Veterinary clinics and hospitals

Geography: The surgical scissors market can be segmented based on geography into various regions, such as North America, Europe, Asia-Pacific, Middle East & Africa, and South America. Factors such as healthcare infrastructure, regulatory policies, and healthcare spending in these regions can influence market dynamics and demand for surgical scissors.

The global surgical scissors market is segmented on the basis of type, application, end user, and region. Based on type, the market is divided into reusable surgical scissors and disposable surgical scissors. The reusable surgical scissors segment held the largest share in 2019, accounting for nearly two-thirds of the market. However, the disposable surgical scissors segment is projected to reach the highest CAGR of 3.9% during the forecast period.

On the basis of application, the market is classified into orthopedics, cardiology, neurology, oral and throat, gastroenterology, dermatology, and others. The gastroenterology segment held the largest share in 2019, contributing to nearly one-fifth of the market. However, the cardiology segment is projected to manifest the highest CAGR of 5.3% during the forecast period.
