Growth Driver Of The Warehouse Execution System Market

The rising growth of the e-commerce sector owing to the pandemic propels the growth of the warehouse execution system market. E-commerce (electronic commerce) refers to the purchasing and selling of goods and services, along with the transmission of payments and data, over an electronic network, primarily on the internet. A warehouse execution system helps E-commerce by managing, optimizing, and directing the physical work processes such as picking, receiving, and replenishment in a warehouse or distribution center.
