Zogby Polling Presidential poll results have been the most accurate (1996 and 2000) or among the most accurate (2004, 2008, 2012, and 2020). They did not poll the 2016 election.

“

We will offer....results among key groups like young voters, married vs. single voters, suburban women, evangelical Christians, military veteran voters, Black and Hispanic, and independent voters.”

Participants will see details of the latest results of the horse race between former President Donald Trump and Vice-President Kamala Harris, plus the results of the race, including minor party candidates.

“We will offer an inside look at the results among key groups like young men and young women voters, as well as among married vs. single voters, suburban women, evangelical Christians, military veteran voters, Black and Hispanic, and perhaps most key - independent voters,” according to Jeremy Zogby, managing partner.

“We not only want to ask about voter preferences but also whether or not these voters will accept or protest the results if their candidate does not win, when they made their final decision, the major issues broken down by demographic groups, which candidate would better handle

these major issues, and who voters think will win despite their preference – often a major predictive indicator,” Jeremy Zogby said.

The session will last 45 minutes and be open to questions and answers.
