

Cell Surface Marker Detection Global Market 2024 To Reach \$8.95 Billion By 2028 At Rate Of 10.2%

The Business Research Company's Cell Surface Marker Detection Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UNITED KINGDOM, October 31, 2024

/EINPresswire.com/ -- The [cell surface marker detection market](#) has

experienced robust growth in recent

years, expanding from \$5.52 billion in 2023 to \$6.06 billion in 2024 at a compound annual growth rate (CAGR) of 9.8%. The growth in the historic period can be attributed to expansion in biomedical research, evolution of high-content screening, increased chronic disease prevalence, shift towards immunotherapy.

What Is The Estimated Market Size Of The Global Cell Surface Marker Detection Market And Its Annual Growth Rate?

The cell surface marker detection market is projected to continue its strong growth, reaching \$8.95 billion in 2028 at a compound annual growth rate (CAGR) of 10.2%. The growth in the forecast period can be attributed to market expansion in emerging economies, expanding

biopharmaceutical sector, adoption of single-cell analysis, rise in chronic and infectious diseases, increasing funding for life sciences research.

Growth Driver Of The Cell Surface Marker Detection Market

The growing chronic diseases are expected to propel the growth of the cell surface marker

The Business
Research Company

Cell Surface Marker Detection Global Market 2024 To Reach \$8.95 Billion By 2028 At Rate Of 10.2%

detection market going forward. Chronic diseases are long-term medical conditions that generally progress slowly over time and persist for an extended duration, often for the rest of a person's life. Cell surface marker detection is used in chronic diseases to help diagnose, monitor, and treat the disease. It allows for a more targeted and personalized approach to patient care, improving the effectiveness of therapeutic interventions.

Which Market Players Are Driving The Cell Surface Marker Detection Market Growth?

Key players in the market include Thermo Fisher Scientific Inc., Beckman Coulter Inc., Siemens Healthineers, Bio-Rad Laboratories Inc., F. Hoffmann-La Roche Ltd., Sartorius, Becton Dickinson and Company, BD Biosciences, Grifols SA, Applied Microarrays Inc., R&D Systems, Agilent Inc., Sigma-Aldrich, Qiagen NV, Sysmex Corporation, Nihon Kohden Corporation, Abnova Corporation, Diasorin SpA, Janssen Diagnostics, Biorad Laboratories, Abcam plc, GenScript Biotech, BioLegend, Cell Signaling Technology Inc., Merck KGaA, Bio-Techne Corporation, Affymetrix, Danaher Corporation, Zymo Research Corporation, Miltenyi Biotec

What Are the Key Trends That Influence The Cell Surface Marker Detection Market Size?

Major companies operating in the cell surface marker detection market are focusing on innovating analysis systems, such as the imaging analysis system, to provide a competitive edge in the market. Fluorescence live-cell imaging analysis systems are advanced microscopy platforms designed to observe dynamic cellular processes and track cellular biomolecules and structures over time.

How Is The Global Cell Surface Marker Detection Market Segmented?

- 1) By Product: Flow Cytometry, Hematology Analyzers, Reagents and Kits
- 2) By Application: Disease Diagnosis, Diseases Identification, Research for Drug Discovery, Cytological Academic Research
- 3) By End-Users: Pharmaceutical and Biotechnology Companies, Hospitals and Clinical Testing Laboratories, Academic and Research Institutes, Other End Users

Geographical Insights: North America Leading The Cell Surface Marker Detection Market

North America was the largest region in the market in 2023. Asia-Pacific is expected to be the fastest-growing region in the report during the forecast period. The regions covered in the report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, Africa.

[Cell Surface Marker Detection Global Market Report 2024](#) from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Macroeconomic factors affecting the market in the short and long run

- Analysis of the macro and micro economic factors that have affected the market in the past five years
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

An overview of the global cell surface marker detection market report covering trends, opportunities, strategies, and more

The Cell Surface Marker Detection Global Market Report 2024 by The Business Research Company is the most comprehensive report that provides insights on cell surface marker detection market size, cell surface marker detection market drivers and trends, cell surface marker detection market major players and cell surface marker detection market growth across geographies. This market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.

What Does [The Business Research Company Do?](#)

The Business Research Company publishes over 15,000 reports across 27 industries and 60+ geographies. Our research is powered by 1,500,000 datasets, extensive secondary research, and exclusive insights from interviews with industry leaders. We provide continuous and custom research services, offering a range of specialized packages tailored to your needs, including Market Entry Research Package, Competitor Tracking Package, Supplier & Distributor Package, and much more.

Our flagship product, the Global Market Model, is a premier market intelligence platform delivering comprehensive and updated forecasts to support informed decision-making.
