What Are The Significant Drivers Behind The Growth Of The Pentavalent Market?

The rising prevalence of diphtheria is expected to significantly boost the growth of the pentavalent market in the coming years. Diphtheria, caused by the bacterium *Corynebacterium diphtheriae*, leads to severe and highly contagious symptoms, including difficulties with eating and breathing, as well as potential skin ulcers. The pentavalent vaccine is designed to protect children against diphtheria, along with four other diseases, through a three-dose immunization schedule. As the incidence of diphtheria increases, so does the demand for pentavalent vaccines, highlighting their critical role in public health and the ongoing need for immunization to combat this life-threatening disease.
