ProServeIT Recognized with Microsoft Verified Managed XDR Solution Status

ProServeIT announces Microsoft engineers verified Alarm Guardian MXDR security solution to help small businesses detect cyberthreats at machine speed.

OAKVILLE, ONTARIO, CANADA, October 29, 2024 /EINPresswire.com/ -- [ProServeIT](#) today announced it has achieved Microsoft verified Managed Extended Detection and Response (MXDR) solution status. By achieving this status, ProServeIT has proven that their robust MXDR services including a Security Operation Center (SOC) with 24/7/365 proactive hunting, monitoring, and response capabilities are all built on tight integrations with the Microsoft Security platform. This solution combines expert-trained technology with human-led services and has been verified by Microsoft engineers.

ProServeIT Microsoft verified Managed XDR Solutions

"We are thrilled to have our [Alarm Guardian MXDR solution](#) verified by Microsoft engineers," says Eric Sugar, President of ProServeIT. "Organizations of all sizes are facing impossible cybersecurity demands with ever evolving cyberthreats. As breaches and security expenses soar, protecting your business without draining your budget is crucial. Our solution combines seasoned expertise with powerful Microsoft security solutions to protect even small and mid-size businesses around the clock and at a fraction of the cost of an in-house team. We help customers detect and neutralize cyberthreats at machine speed, giving them peace of mind that their data and environment are well protected."

"With malicious attacks on the rise, we understand security is front and center for our customers. That is why I am excited to congratulate ProServeIT on achieving Microsoft Verified: Managed Extended Detection and Response solution status. Their solution closely integrates with Microsoft 365 Defender and [Microsoft Sentinel](#) and has been verified by Microsoft Security engineering to ensure that it provides comprehensive service coverage across the Microsoft Security portfolio." – Rob Lefferts, CVP, Modern Protection and SOC, Microsoft
