

# InventionHome® Product Developer Creates Saw Bit Split Down the Middle to Easily Cut Circular Holes in Any Type of Wood

PITTSBURGH, PA, UNITED STATES, October 29, 2024 /EINPresswire.com/ -- Michael F. of Loysville, PA is the creator of the Split Hole Saw Bit, an improved split hole saw bit designed to cut and remove circular holes in wood. The bit is split down the center and held together by a nut on the top, offering smoother cutting through the center of wood. Cutting teeth are installed on the base of the bit.

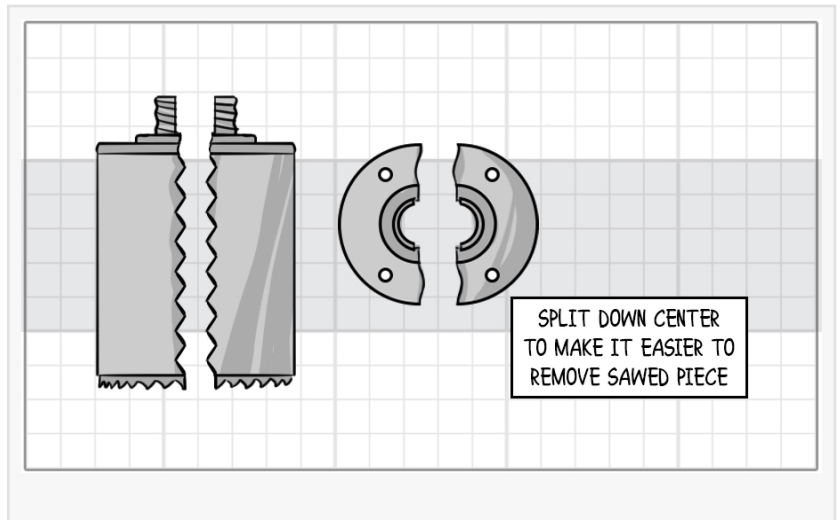

Once a user has cut through the wood, the nut can be turned out which holds the pilot bit and both halves in place. Users can quickly and easily cut through the center of wood pieces without wasting any time. The tool ultimately offers smoother cutting through any type of wood to save considerable time and effort for contractors, homeowners, maintenance workers, and much more.

The market for hole saw bits designed specifically to cut circular holes in wood is well-established and competitive, serving both DIY enthusiasts and professional contractors. Demand is fueled by needs across construction, cabinetry, furniture-making, carpentry, and

various home improvement projects. Being able to efficiently cut circular shaped holes in these types of projects saves considerable time, allowing contractors to focus on other areas of work that require more intricacy.

Current available products like carbon steel bits, bi-metal hole saws, carbide-tipped hole saws, and adjustable hole cutters are useful and popular within this market; however, there is still a significant need for a product that both cuts and removes holes within wood. As woodworking tools continue to advance, users are consistently looking for new and specialized tools that save time and effort. The Split Hole Saw Bit fits perfectly within this niche market and would significantly enhance any manufacturer's product line.

Michael filed his Utility Patent with the United States Patent and Trademark Office (USPTO) and is working closely with [InventionHome](https://www.inventionhome.com), a leading invention licensing firm, to sell or license the patent rights to his Split Hole Saw Bit product. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this product innovation.

Companies interested in the Split Hole Saw Bit can contact InventionHome at [member@inventionhome.com](mailto:member@inventionhome.com). Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at [info@inventionhome.com](mailto:info@inventionhome.com) or by calling 1-866-844-6512.

#### About InventionHome®

InventionHome is a leading invention and product licensing firm focused on helping inventors and entrepreneurs through the invention and patent process with the goal of licensing or wholesaling client inventions. For more information, email [info@inventionhome.com](mailto:info@inventionhome.com) or visit <https://www.inventionhome.com>.
