

# Creative BioMart Expands Offerings for Cytokines to Meet Diversified Research Needs

*Creative BioMart, one of the world leading biotechnology companies that serving science, is pleased to expand its offerings for cytokines.*

SHIRLEY, NY, UNITED STATES, October 30, 2024 /EINPresswire.com/ -- Creative

BioMart, one of the world leading biotechnology companies that serving science, is pleased to expand its offerings for [cytokines](#), aiming to support the increasingly diversified needs of biomedical researchers.

Cytokines are small water-soluble signaling proteins and glycoproteins secreted by hermatopoietic and nonhermatopoietic cells of the immune system. These intercellular messengers control a number of biological functions, such as immune cell activation, proliferation, and differentiation. Some cytokines are primarily lymphocyte growth factors, some function as pro- or anti-inflammatory, and others polarize the immune response to antigens.

Cytokines can be divided into interleukins (ILs), [growth factor](#), tumor necrosis factors (TNFs), chemokines, colony-stimulating factors (CSFs), interferons (IFNs), etc. Upon the update, Creative BioMart now provides a series of recombinant cytokines and their receptors with high purity, high bioactivity, and high batch-to-batch consistency to accelerate its customers' scientific research an drug development programs.

Some of the featured cytokines products at Creative BioMart include:

[Active Recombinant Chicken IFNA](#)

Active Recombinant Human IL2

Active Recombinant Human IL4 protein

Active Recombinant Human TNFRSF17, Fc-tagged, Biotinylated

Active Recombinant Human TNFRSF9 protein(Met1-Gln186), hFc-tagged

Active Recombinant Swine Chemokine (C-X-C motif) Ligand 11

Active Human IL8

Recombinant cynomolgus TNFRSF18 protein, His-tagged

Recombinant Human FAS, His & GST tagged

Recombinant Human CCL19 protein, His-tagged

...

“Recognizing the critical role cytokines play in both health and disease, we decided to expand our offerings to help researchers better understand the complex immune response and develop novel therapeutic strategies.” said Linna, the chief marketing staff at Creative BioMart. “We are confident that our products can help transforming our understanding of human health and disease and improve patient outcomes.

According to Linna, cytokines products at Creative BioMart are recombinantly expressed and rigorously validated for purity, identity, and bioactivity. Additionally, the company also offers custom cytokines services, allowing researchers to request specific cytokines or formulations tailored to their research needs, e.g. different segments, length, tag, tag location, etc.

To know more information about cytokines, or the whole list of cytokines products provided by Creative BioMart, please visit <https://www.creativebiomart.net/gene-family-11-cytokines.htm>.
