Furthermore, as software shifts away from the traditional on-site licensing model, SaaS and other cloud escrows are becoming increasingly more important, thus driving the growth of the market. In addition, the opportunity for SaaS escrow services market lies in the developing economies as they have gradually grown to become the hub for IT services, one of the largest target segments for SaaS escrow services. In addition, substantial increase in the number of startup and small & medium enterprises is expected to lead to increased adoption of SaaS escrow services in such regions.

On the contrary, the rapid deployment of new features and functionality that make agile development popular among software companies and end users alike made traditional escrow depositing practices obsolete. Hence, SaaS escrow providers must embrace technological advances to improve the quality and value of their services. Furthermore, increase investment in sector such as BFSI, government & defense, healthcare, IT & telecom and others, are expected to provide lucrative opportunities for the market growth during the forecast period.

On the basis of enterprise size, the large enterprise segment dominated the SaaS escrow services market size in 2021 and is expected to continue this trend during the forecast period.

Surge in adoption of SaaS escrow services in large businesses open numerous opportunities for the market growth. However, the small and medium-sized enterprises (SMEs) segment is expected to experience fastest growth in the coming years. Factors such as rise in adoption of subscription-based services and increase government initiatives through various digital SME campaigns throughout the world fuel the growth of the SaaS escrow services industry.

Region-wise, North America dominated the market share in 2021 for the SaaS escrow services market. Adoption of SaaS escrow services growing steadily to meet increasing demands from today's businesses to enhance their business process and improve the customer experience will provide lucrative opportunities for the market in this region. However, Asia-Pacific is expected to exhibit highest growth during the forecast period. This is attributed to rising adoption of SaaS-based services and increase digital transformation initiative are particularly fueling regional market growth.

The COVID-19 outbreak will surely provide numerous opportunities for the market to grow in the forecasted period. These opportunities include the rise in digital transformation trend in the enterprises; upsurge in adoption of cloud-based solutions by small businesses; and upsurge in demand for SaaS-based services that are hosted or managed in the cloud.

Moreover, the surge in remote work trend across the enterprises due to COVID-19 is one of the key opportunities for the market growth due to cloud-based solutions & services. Furthermore, many technology escrow companies are offering a special escrow products intended for SaaS only, which provide for the continuous update of deposit materials and include data as part of the deposit materials. The SaaS version of the escrow product is more likely to provide uninterrupted access to the full set of materials that the customer or business partner previously had access to in the cloud, so it is likely to be the better fit for the customer or partner seeking source code escrow to a SaaS product, a SaaS provider will have a variety of considerations to contemplate before acquiescing to such demands in a negotiation. This in turn boosts the SaaS escrow services market forecast.
