Executive Summary:

Trade credit insurance is a financial product that protects businesses against the risk of non-payment by their customers. It is particularly important for companies engaged in international trade, where payment risks can be higher. Insurers assess the creditworthiness of customers and provide coverage that allows businesses to mitigate risks associated with selling goods or services on credit. The market is influenced by the growth of global trade and the need for businesses to protect their receivables, but it also faces challenges from economic fluctuations and complex regulatory environments across different regions.

Key Drivers:

Digital transformation of insurance processes

Key Challenges:

Increasing global trade, growing need for risk mitigation in transactions

Key Risks:

Economic downturns, regulatory complexities

Market Segments and Sub-sections
