

# Dr. Brooke Taylor, U.S. Wargaming Expert, Presents at Official UK Government Academic Conference

*Exploring the Critical Role of Wargaming in National Security Strategy*

LONDON, ENGLAND, UNITED KINGDOM, November 4, 2024

/EINPresswire.com/ -- [Defending Our Country \(DOC\), LLC](#) is proud to announce that its founder and CEO, [Dr. Brooke Taylor](#) will be presenting at the prestigious UK Deterrence and Assurance Academic Alliance (DAAA) 2024 Conference today. The event at King's College London provides a platform for Dr. Taylor to share insights on "Deterrence Wargaming." This is the third consecutive year Dr. Taylor has presented at this event.

The DAAA 2024 Conference is an official UK event sponsored by the Foreign, Commonwealth and Development Office, the DAAA, the Defense Science and Technology Laboratory (DSTL), and King's College London. This gathering will bring together leading experts to discuss the critical role of deterrence in shaping national security strategies.

The [U.S. Congressional Wargaming Working Group report](#) (made possible in part by the United States Bomb Tech Association) serves as a vital resource for policymakers, highlighting the interconnected issues of talent, innovation, and preparedness essential for addressing current global threats.

The report, already delivered to the Senate and House Armed Services and Appropriations Committees, focuses on the "War on Talent, Innovation, and Preparedness (T.I.P.)" as the foundation for addressing global tensions in Eastern Europe, the Middle East, the Indo-Pacific, and Africa. It calls for increased investment in American students, expanded research and

development, and incentives for private-sector collaboration to transform today's challenges into opportunities for national advancement.

"Strategic foresight through wargaming is more than an academic exercise, it's a necessary tool for effective decision-making," said Dr. Brooke Taylor, founder and CEO of DOC. "Our report emphasizes that addressing the 'War on Talent, Innovation, and Preparedness (T.I.P.)' is crucial to navigating the complexities of today's geopolitical landscape."

Dr. Brooke Taylor

The report outlines key recommendations for the U.S. Congress, advocating for increased investment in education and research, as well as fostering private-sector partnerships to harness innovation.

“

As new global alliances emerge between adversarial nations it is imperative for the U.S. and its allies to strengthen partnerships and foster a unified approach to national security.”

*Dr. Brooke Taylor*

"As new global alliances emerge between adversarial nations such as Russia, China, Iran, and North Korea, it is imperative for the U.S. and its allies to strengthen partnerships and foster a unified approach to national security. Wargaming exercises provide an essential forum for U.S. and international partners to refine strategies, share insights, and prepare for complex geopolitical shifts," Dr. Taylor noted. "By working together, we can collectively address threats to stability and secure a strategic

advantage."

"By integrating diverse perspectives from government, academia, and industry, we can develop comprehensive solutions that empower our national security framework," Dr. Taylor added. "Wargaming forces difficult conversations that bridge information gaps and enable voices to be heard at a strategic level. This collaborative approach is vital in preparing our nation for the challenges ahead."
