What Are the Market Size Estimates for the Global Outdoor Heating Market and Its Expected Growth Rate?

The outdoor heating market is projected to experience robust growth in the coming years, reaching \$5.28 billion by 2028 at a compound annual growth rate (CAGR) of 6.6%. This anticipated growth during the forecast period can be attributed to an emphasis on outdoor comfort at home, an increase in outdoor dining preferences, recovery in the hospitality industry, urbanization, limited indoor spaces, and heightened awareness of health and wellness in outdoor settings.

What Are The Primary Growth Drivers Of The Outdoor Heating Market?

The increase in disposable income is expected to propel the growth of the outdoor heating market in the future. Disposable income refers to the funds available to an individual or household for spending and saving after accounting for taxes and essential expenses. The growth of the outdoor heating market is closely associated with rising disposable income, as consumers are more likely to invest in outdoor comfort solutions, thereby contributing to the market's expansion.
