

Tom Sawyer Software Announces Release of Explorations 1.1

New Features Enhance the Data Investigation Workflow

BERKELEY, CA, UNITED STATES, November 6, 2024 /EINPresswire.com/ -- Tom Sawyer Software, the leader in graph and data visualization and analysis technology, announces the release of Tom Sawyer Explorations 1.1. The latest release of Tom Sawyer Explorations enhances our no-code platform and analysts' data exploration workflow with robust new features designed to streamline and secure the analysis experience.

New table view offers the flexibility and control needed for a seamless and efficient exploration experience.

Tom Sawyer Explorations 1.1 benefits analysts by providing seamless project continuity and the ability to organize data to optimize investigations.

“

With Tom Sawyer Explorations 1.1, we provide effective graph visualization and analysis to ease data analysis and navigation for our users.”

Janet M. Six PhD, Senior Product Manager at Tom Sawyer Software

“With Tom Sawyer Explorations 1.1, we provide effective graph visualization and analysis to ease data analysis and navigation for our users,” said Janet M. Six PhD, Senior Product Manager at Tom Sawyer Software. “These enhancements simplify analysts' work by offering a smooth data exploration experience enabling them to concentrate on their analyses.”

Key features of Explorations 1.1 include:

Create and Manage Projects: Ability to manage individual data exploration projects keeps users focused on analysis.

Add new projects and Explorations auto-saves database connections, loaded elements, styling, filters, and active analysis algorithms allowing you to effortlessly pick up right where you left off without any worry of losing progress.

Table View: A new table view accelerates the investigation experience. Add and customize as many tables as needed, selecting element types, attributes, and column order to suit your analysis. Tables are searchable and synchronized with the drawing view, offering the flexibility and control needed for a seamless and efficient exploration experience.

Authentication: Added support for authentication using Keycloak strengthens security. This feature provides enhanced security and user management capabilities, ensuring secure access for a more robust analysis environment.
