JASCI Software Recognized in Gartner® Hype Cycle for Supply Chain Execution Technologies, 2024 report in two categories

BOSTON, MA, UNITED STATES, November 7, 2024 /EINPresswire.com/ -- JASCI Software, a leader in cutting-edge supply chain solutions, is thrilled to announce its recognition in two categories of Gartner 2024 Hype Cycle for Supply Chain Execution Technologies.

We believe that this recognition highlights JASCI's continued innovation and its role in advancing the supply chain capabilities of companies in the fast-paced world of eCommerce and wholesale distribution.

Gartner Hype Cycle Recognizes JASCI's Robotics Orchestration Software

Category 1: Multiagent Orchestration Platform for Warehouse Robotics

Gartner has identified JASCI Software as Sample Vendor in the emerging Multiagent Orchestration Platforms (MAO) category.

Why This Matters to us: For companies looking to scale their operations, especially in eCommerce and wholesale distribution, JASCI's MAO platform offers the ability to coordinate and optimize tasks across a variety of robotic systems, reducing costs and improving operational efficiency.

Category 2: Warehouse Execution Systems
JASCI Software has also been recognized as a Sample Vendor in Warehouse Execution Systems (WES).

Why This Matters to us:

In today's competitive landscape, where rapid order fulfillment is crucial, JASCI's WES allows

companies to manage both automated and manual processes in real-time, ensuring that every aspect of the warehouse operates at peak efficiency.

Craig Wilensky, CEO of JASCI Software, commented on the recognition:

"We are excited to be recognized by Gartner in two pivotal categories within the 2024 Hype Cycle for Supply Chain Execution Technologies. We believe that this recognition is a testament to our team's dedication to innovation and our mission to redefine how companies approach automation and orchestration in their supply chains. As the demands of eCommerce and wholesale distribution continue to evolve, JASCI remains committed to providing the cutting-edge technology our customers need to stay ahead of the curve and deliver operational excellence."
