How Big Is the Global Collagen Market Expected to Grow,
and What Is Its Annual Growth Rate?

The market is projected to grow to \$10.19 billion by 2028, with a CAGR of 9.9%. This growth is driven by an aging population, a rising healthcare sector, increasing disposable incomes, and growth in research and development. Trends to watch include plant-based collagen, clean label products, personalized collagen supplements, the rise of digital health apps, and clinical validation of products.

What Is Driving the Growth of the Collagen Market?

The growing prevalence of obesity is significantly driving the market. Obesity increases the risk of various health issues, prompting consumers to seek solutions such as collagen supplements, which can enhance feelings of fullness and support weight management. The World Heart Federation reported that approximately 2.3 billion individuals were classified as obese or overweight in 2023, with projections suggesting this number could reach 2.7 billion by 2025. This escalating obesity trend is creating a robust market for collagen products.
