Prime determinants of growth

The global small business loan market is experiencing growth due to several factors such as the increasing number of start-ups and small businesses, the growing availability of distinct loan options tailored to meet the unique needs of small businesses, and the rising technological revolution in lending processes. However, the stringent loan approval processes for small businesses, high compliance costs for lenders, and limited financial literacy among small business owners hinder market growth to some extent. Moreover, the increasing government support to small businesses through loan guarantee programs, along with the surge in focus on expanding accessibility to credit for underserved populations offers remunerative opportunities for the expansion of the global small business loan market.

The small loans segment is expected to grow faster throughout the forecast period.

Based on the loan type, the small loan segment held the highest market share in 2023, accounting for nearly two-thirds of the global small business loan market revenue and is likely to retain its dominance throughout the forecast period. The demand for small loans is driven by the growing need for managing short-term financing to manage cash flow, purchase inventory, and cover operational expenses, along with the growing number of business renovation and

upgrade projects. Further, the rise of fintech companies and alternative lending platforms has made it easier for small businesses to access small loans, resulting in a significant growth prospect for the small loan segment.

The mid-term loan segment is expected to grow faster throughout the forecast period.

Based on the tenure, the mid-term loans segment held the highest market share in 2023, accounting for about two-fifths of the global small business loan market revenue and is likely to retain its dominance throughout the forecast period. This can be attributed to the fact that small businesses may require medium-term loans to refinance existing debt or restructure their liabilities. This facilitates a reduction in monthly payments, securing lower interest rates, or extending the repayment period to improve cash flow management. Moreover, the growing need for equipment financing and the rising focus on improving financial forecasting are anticipated to drive down the demand for the mid-term loans market.

The small business segment is expected to garner faster throughout the forecast period.

Based on the application segment, the small business segment held the highest market share in 2023, accounting for almost three-fifths of the global small business loan market revenue, and is likely to retain its dominance throughout the forecast period. The increasing focus of small businesses in real estate and infrastructure investments, along with the ongoing trend of economic diversification strategies. As economies diversify, small businesses are emerging in new sectors, such as renewable energy, tech startups, and specialized manufacturing. These sectors often require significant initial investment, increasing the demand for loans. However, the small business segment is projected to manifest the highest CAGR between 2023 and 2032, owing to the globalization trends, supportive regulatory frameworks, and technological developments to compete more effectively with the larger firms.

North America to maintain its dominance by 2032

Based on region, North America held the highest market share in terms of revenue in 2023, accounting for almost two-fifths of the global small business loan market revenue, and is expected to rule the roost in terms of revenue throughout the forecast timeframe. The growing entrepreneurial culture and the rise of startup businesses in this region primarily drive the growth. Moreover, the rise of alternative lending institutions, including peer-to-peer lenders and online loan providers, has expanded credit availability to small businesses, which may fuel market development in this region. In addition, supportive government policies and economic expansion initiatives are anticipated to contribute to industry growth across North America.

Players: -

American Express

Bank of America
Bluevine Inc.
Huntington Bank
