WILMINGTON, NEW CASTLE, DE, UNITED STATES, November 6, 2024 /EINPresswire.com/ -- The global [chatbot market](#) size was valued at \$537 million in 2020, and is projected to reach \$7.8 billion by 2030, registering a CAGR of 30.7% from 2021 to 2030. Handling consumer queries in

real-time can get a little tricky in some cases. Major business corporations like Amazon (which has been using data analytics tools in their ecosystems for more than a decade). Amazon with the partnership with their subsidiary Amazon web services has developed specific algorithms focused on the analyzing needs of its customers and giving out accurate responses according to the needs of their customers, thanks to its army of in-house data scientists and analysts. Furthermore, corporations like Amazon, which have deal with millions of customers on a daily basis, employing thousands of employees to help each customer query will take a lot of valuable resources and time; advanced chatbots are used to deal with these issues.
