

# Ventusky Launches New Embed Option for Interactive Weather Maps on Websites

PRAGUE, CZECH REPUBLIC, November 6, 2024 /EINPresswire.com/ -- [Ventusky](https://www.ventusky.com/) has introduced a new feature that allows webmasters to embed interactive weather maps directly into their websites, bringing dynamic, real-time weather visualizations to any web platform. Responding to feedback from the Ventusky user community, this feature offers site owners a practical solution for displaying detailed weather information with the same functionality available on the main Ventusky site.

Embed live maps into any website

The embed feature provides a fully interactive map with user controls, including a timeline slider for forecast visualization, zooming, and multiple weather layers—precisely like on [Ventusky.com](https://www.ventusky.com/). This allows website visitors to explore up-to-the-minute weather details, view forecasts, and even select specific weather data layers such as wind patterns, precipitation, temperature, and radar.

The new embed option opens up a convenient way for websites to share comprehensive weather data.”

*David Prantl*

## Key Features and Benefits:

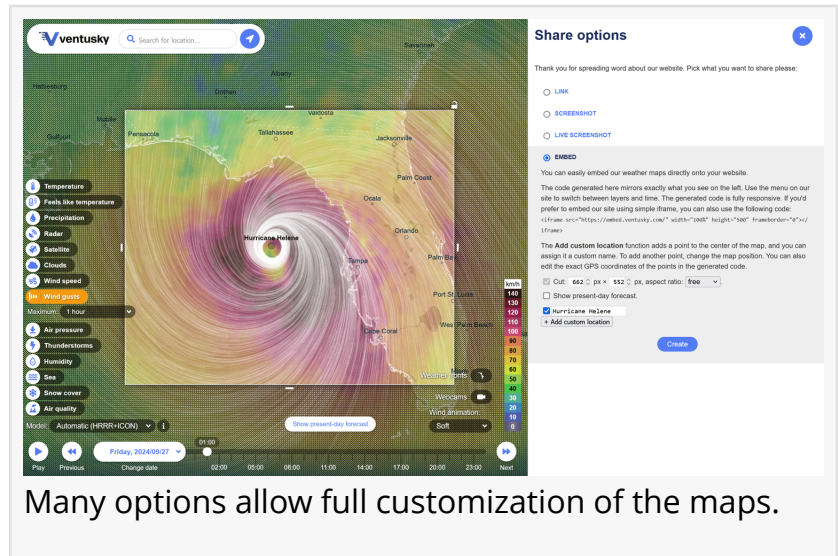

- **Enhanced User Experience:** Embedded maps bring Ventusky’s detailed weather views directly to the audience of any website, allowing users to access live, interactive weather information without leaving the site.
- **Fully Functional Controls:** Just as on the Ventusky

platform, the embedded maps include controls for time, layer selection, and data visualization, enabling users to navigate through various weather data layers or forecast periods.

- **Versatile Data Options:** From temperature and radar to wind speed and precipitation, webmasters can configure the map to display the most relevant weather data for their specific audience.
- **Seamless Integration:** The map’s design allows for easy embedding on diverse websites,

offering a valuable feature for tourism sites, outdoor planning resources, news outlets, and more.

David Prantl, CEO of Ventusky, commented, "The new embed option opens up a convenient way for websites to share comprehensive weather data. Our goal was to replicate the interactive, informative experience of Ventusky.com in a format that's simple for webmasters to integrate and use."

Many options allow full customization of the maps.

The embed feature is now available through the Share section on Ventusky's platform. For more information on embedding Ventusky's interactive weather maps, visit [my.ventusky.com](https://my.ventusky.com).
