

# Goldman Sachs, Deutsche Bank, and J.P. Morgan Finance Experts among Speakers at Tokenisation Summit 2024

LONDON, UNITED KINGDOM, November 7, 2024 /EINPresswire.com/ -- KEY Wire is delighted to announce that it is an official supporter of [The Tokenisation Summit 2024](#), which is being held at the Royal Garden Hotel, London on 21 November.

The summit is a groundbreaking event where banks, asset managers, hedge funds, venture capital funds, regulators, central banks and international policy makers from across the world will come together to explore the latest developments in tokenisation.

The Tokenisation Summit will analyse the economics and use cases of tokenisation from the perspective of the traditional markets. The key questions are which problems can tokenisation help to solve, how can it be integrated, and how do you scale it? The agenda is divided into (1) assets (funds and securities) tokenisation and (2) money (CBDC, stablecoins, tokenised deposits and collateral) tokenisation. The programme builds on the cross-industry work undertaken by various trade associations in the City of London to develop tokenisation from a concept into a usable technique with widespread applications in financial markets. The programme examines the developments and innovations in different regions – the UK, Europe, US, Singapore, Hong Kong and the Middle East, and how these regions can collaborate to scale tokenisation and to create a global regulatory framework. It will also look at the [enablers for tokenisation](#) – the developments in infrastructure and custody solutions.

The summit will enable participants to benefit from the invaluable insights of leading firms such as Goldman Sachs, UBS, abrdn, J.P. Morgan, BNY Mellon, Franklin Templeton, State Street Digital, Nomura, Deutsche Bank, Brevan Howard Digital, Societe Generale, and from international regulators from the UK, Europe, US and Singapore such as the CFTC, FCA, Bank of England, HM

Treasury, ECB, BIS Innovation Hub and the Monetary Authority of Singapore on how global collaboration is going to be achieved.
