

4x4 by Shayan Ramesht Wins Bronze in A' Furniture Design Awards

*Innovative Recycled Paper Tube Bench
Recognized for Its Unique Design and
Sustainable Approach*

COMO, CO, ITALY, November 6, 2024 /EINPresswire.com/ -- The prestigious A' Design Award, one of the world's most respected and well-recognized awards in the field of [furniture](#) design, has announced [Shayan Ramesht's](#) innovative work, "4x4," as the Bronze winner in the Furniture Design category. This highly prestigious recognition highlights the exceptional creativity and practicality of Ramesht's design, which showcases the potential of recycled materials in creating functional and aesthetically appealing furniture.

The 4x4 bench's unique design approach, which utilizes recycled paper tubes and plastic parts to create a stable and visually striking piece of furniture, aligns perfectly with the growing trend of sustainable design in the furniture industry. By demonstrating the practical benefits of using recycled materials, Ramesht's work not only appeals to environmentally conscious consumers but also inspires other designers and manufacturers to explore more sustainable practices.

Constructed from 16 recycled paper tubes, each measuring 160 centimeters in length, the 4x4 bench showcases Ramesht's ingenious solution to the challenge of placing the tubes on the smallest possible contact surface of the circle. By designing and producing recycled plastic pieces to prevent lateral movement of the tubes, Ramesht has created a stable and visually striking piece of furniture that stands out in the market for its innovative use of materials and thoughtful design.

4x4

This recognition from the A' Furniture Design Award serves as a testament to Shayan Ramesht's commitment to pushing the boundaries of sustainable design and inspiring others in the industry to follow suit. As the 4x4 bench gains international exposure through this prestigious award, it has the potential to influence future trends in furniture design, encouraging more designers and manufacturers to explore the possibilities of recycled materials and innovative construction techniques.
