

iStorage Holdings Strengthens Global Reach by Joining CAST

iStorage, a leading innovator in hardware-encrypted data storage, proudly announces joining CAST group, with the mission to unite data protection companies.

LONDON, UNITED KINGDOM,
November 11, 2024 /

[EINPresswire.com/](https://www.einpresswire.com/) -- iStorage Holdings, a leading innovator in hardware-encrypted data storage and cloud security solutions, proudly announces its partnership with CAST, a group with the mission to unite like-minded entrepreneurial companies within data protection, storage, servers and reliable communication.

Through this partnership, iStorage Holdings, which includes iStorage Ltd, based in London, UK, and Kanguru Solutions, based in Boston, USA, will join CAST. Founded in 2024 by Systematic Growth, a Swedish investment company focussed on building niche leaders, CAST will deliver a comprehensive range of state-of-the-art information security products and services on a global scale towards the growing information security market.

With a combined history of almost 50 years, iStorage and Kanguru have designed, developed and manufactured some of the world's most innovative data storage solutions, trusted by sectors including government, military, healthcare, energy, and finance. Joining forces with CAST marks a significant milestone in iStorage and Kanguru's shared mission to provide cutting-edge, user-friendly, hardware-encrypted data storage solutions worldwide.

John Michael, Founder & CEO of iStorage, commented:

"As part of CAST, we are now positioned to achieve even greater heights. This partnership will provide access to extensive resources, expanded technological capabilities and a broader market reach. These combined strengths will accelerate innovation, enhance our product offerings,

expand our geographic footprint and better serve our customers and partners.”

Nate Cote, MD Americas and Chief Growth Officer of Kanguru, commented:

“This acquisition marks our first shovel in the ground for the CAST platform—an inaugural step towards establishing a robust foundation for an expansive, global future. It underscores our commitment to pioneer innovation and certified leadership in the global information security sector. We are setting the stage for a new era of growth and industry leadership.”

Jakob Holm, CEO of CAST, commented:

“The confidence that the team at CAST has demonstrated in us through this investment validates the past, present, and future vision of the combined group as the global leader in the secure storage sector. We are excited to continue earning the trust of our customers and partners worldwide for years to come.”

This announcement follows iStorage’s recent acquisition of Kanguru Solutions, a U.S.-based leader in high-security data storage drives. This strategic move has significantly broad-ened the Group’s portfolio of secure, user-friendly products and substantially expanded its customer-centric channel partner network, thereby establishing a global powerhouse in secure data.

As cyber threats become increasingly complex, the combined capabilities of iStorage, Kanguru, and CAST will continue to provide robust protection for sensitive data worldwide.
