alt.ai partners with AI Singapore to grow Asia-led generative AI field

Japan and Singapore jointly accelerate the promotion and diffusion of AI to create the future of the Southeast Asian market

TOKYO, JAPAN, November 8, 2024 /EINPresswire.com/ -- alt Inc. (https://alt.ai/en/, head office: Minato-ku, Tokyo; CEO: Kazutaka Yonekura), is pleased to announce a partnership with Singapore's national AI programme, AI Singapore.

alt.ai partners with AI Singapore to grow Asia-led generative AI field☐Japan and Singapore jointly accelerate the promotion and diffusion of AI to create the future of the Southeast Asian market

Through this partnership, we aim to contribute to the technological development of the field of generative AI in Singapore and across Asia. This includes exploring ways to enhance alt's AI technology, including altBRAIN and CLONEdev by incorporating AI Singapore's SEA-LION (Southeast Asian Languages In One Network) models and datasets, as well as planning for joint development with AI Singapore.

The partnership will strengthen and improve alt's AI services in Asia, particularly in Japan and Singapore, with a view to providing large language models (LLMs) through our API platform, alt developer.

In addition, alt has the development capabilities of LLMs that have achieved the highest accuracy and inference speed in the complex language of Japanese, with LHTM-OPT*1 released in October 2023 and LHTM-OPT2*2 released on 29 October 2024. Utilizing this technological capability, alt will actively contribute with SEA-LION, with the goal of developing LLMs for the relatively complex languages of Southeast Asia and the rapidly growing emerging countries.

*1 alt Inc. announces LHTM-OPT, a lightweight, high accuracy large language model
☐The model achieved the highest score in the Rakuda benchmark for Japanese LLMs, making it the most accurate commercial private LLM in Japan

🔗About alt Inc.
Founded in November 2014, alt is a company that "aims to free people from unproductive labor" by creating "P.A.I." (Personal Artificial Intelligence) and AI clones. In addition to AI GIJIROKU, a communication intelligence that utilizes speech recognition technology born from the development of an AI dialogue engine, we also develop and provide products, such as altBRAIN, AI Call Center, and CLONEdev, that provide solutions to various business issues through PoC (Proof of Concept).
