Chen's entry into the film and TV industry was marked by perseverance and a dedication to gradual success. She worked her way up, believing firmly in the power of cinema to create impactful, cross-disciplinary narratives. Her focus was not on instant fame but on establishing a solid footing as a producer who could authentically integrate her love for hockey into her films.

Despite the challenges associated with sport-themed films, particularly hockey, Chen saw an untapped opportunity. "Sport movies, especially about hockey, are niche, but their potential is undeniable," she states. This belief motivated her to produce *The Phantom on Ice*, addressing themes of female growth and struggle within the sports arena.

The production of *The Phantom on Ice* was fraught with hurdles, primarily in financing. The skepticism of investors due to the film's niche subject matter was a significant barrier. Chen, in

collaboration with director Nan Guang, devised a meticulous financing strategy that secured necessary funds both domestically and internationally. Her approach to managing these funds and coordinating the production emphasized her commitment to bringing the project to fruition against all odds.

Chen's involvement in the production went beyond executive decisions; she immersed herself in every aspect, from script selection to actor auditions. Her hands-on approach ensured the film authentically represented the intensity of hockey while weaving in the personal growth stories of its characters.

During script modifications, Chen worked closely with the scriptwriter to ensure the narrative not only captured the excitement of the sport but also prompted audiences to reflect on the societal roles of women. The casting was equally thoughtful, with actress Yan Luyang chosen for her ability to embody the film's spirit through her performance and rapid mastery of hockey skills.

The Phantom on Ice stands as a testament to female empowerment, illustrating the dual capabilities of women to excel in sports and lead in professional settings. The film is a personal reflection of Chen's own experiences and growth in the industry, symbolizing her journey from an intern to a lead producer capable of steering major cinematic projects.

Looking ahead, Chen is already considering future projects that blend science fiction with reality, focusing on themes like AI, human relationships, and gender equality. She remains committed to using cinema as a platform to highlight women's struggles and achievements in various fields.
