The Business Research Company

The [healthcare provider network management market](#) has experienced significant growth in recent years. It is projected to increase from $4.03 billion in 2023 to $4.72 billion in 2024, reflecting a compound annual growth rate (CAGR) of 17.1%. This growth during the historical period can be linked to factors such as the rise of value-based care models, heightened regulatory compliance requirements, the increasing complexity of healthcare networks, a focus on patient-centric care delivery, and market consolidation and mergers.

What Is the Anticipated Growth Rate and Market Size of the Global Healthcare Provider Network Management Market?

The healthcare provider network management market is expected to experience rapid growth in the coming years. It is projected to reach $8.61 billion by 2028, with a compound annual growth rate (CAGR) of 16.2%. This growth during the forecast period can be attributed to factors such as interoperability challenges, the integration of telehealth, an increased focus on cybersecurity in healthcare, population health management strategies, a shift towards decentralized care, and changes in regulatory and reimbursement models.

What Is The Primary Growth Driver Of The Healthcare Provider Network Management Market?

The growing geriatric population is projected to drive the expansion of the healthcare provider network management market in the coming years. The geriatric population consists of individuals who are elderly, usually aged 65 and older, and have specific healthcare needs related to aging. The healthcare provider network management market is essential in meeting the changing requirements of this increasing demographic by improving healthcare delivery, enhancing care coordination, and ensuring efficient resource allocation. As the demographic landscape shifts toward a larger elderly population, effective network management becomes crucial for addressing the unique healthcare needs of this expanding segment.
