What Is Accelerating Growth in the Immunosuppressants Market?

The rising prevalence of autoimmune diseases is expected to drive the growth of the immunosuppressants market. Autoimmune diseases encompass a wide range of conditions in which the immune system mistakenly targets and harms healthy cells, tissues, and organs. Immunosuppressant medications can be beneficial for conditions like rheumatoid arthritis by dampening the overactive immune response, which helps reduce symptoms and slows disease progression. These diseases are particularly common in the elderly population.
