

Excel Dryer launches continuing education program for design professionals centered on real life renovation project

SPRINGFIELD, MA, UNITED STATES,
November 12, 2024 /

EINPresswire.com/ -- Having redefined workplace health and wellness with its recent human-centric office renovation, [Excel Dryer, Inc.](#),

manufacturer of the [XLERATOR® Hand Dryer](#), is raising the bar once again with its launch of an exclusive continuing education program for design professionals. Entitled “Healthy Interiors: Using the WELL Building Standard™ to Design Commercial Spaces of the Future” focus on a real life renovation project integrating specific products to achieve [WELL Certification](#).

It was a labor of love that invited us to underscore our commitment to setting industry standards while establishing a new benchmark for office design.”

*Joshua Griffing, Excel Dryer
Director of Marketing and
International Sales*

“Our office renovation broke barriers,” said Joshua Griffing, Director of Marketing and International Sales at Excel Dryer. “It was more than a renovation; it was a labor of love that invited us to underscore our commitment to setting industry standards while establishing a new benchmark for office design. From the very start, we knew we could pave the way for others by sharing what we learned.”

The interior design was developed by the Boston-based firm Fennick McCredie Architecture, led by their

Sustainability Practice Leader Katherine Brekka, AIA, LEED AP, WELL AP. The course was approved by American Institute of Architects (AIA), Green Business Certification, Inc. (GBCI) and the International Design Continuing Education Council (IDCEC). Learning objectives include how strategies within the WELL Building StandardSM can be leveraged to support occupant health and well-being, sustainability, flexibility, and aesthetics. The program is a tremendous resource for learning how to achieve WELL Certification by using the right products, some of which are featured in the Works With WELL directory.

“As environmental stewards and manufacturers, Excel really wanted to embody the values of their company within the design of the space,” said Fennick McCredie Senior Associate Katherine

Brekka, who worked directly on the renovation that inspired the new course. "They wanted to not only talk the talk, but walk the walk through their own office expansion, really focusing on a human-centric design that prioritized the health and wellbeing of the employees."

Course presentation can be live or virtual, and an online versions are available through Green CE and AEC Daily. Test takers can earn one learning unit/HSW (health, safety, welfare) hour. Learn more at
