The aquaculture products market has experienced significant growth in recent years, expanding from \$31.81 billion in 2023 to \$34.28 billion in 2024, with a compound annual growth rate

(CAGR) of 7.8%. This growth is driven by rising demand for fish farming, advancements in fishing technology, government initiatives supporting aquaculture, increased seafood consumption, the development of mariculture, and growing awareness of sustainable practices.

“

It will grow to \$46.48 billion in 2028 at a compound annual growth rate (CAGR) of 7.9%.”

The Business Research Company

What Is the Projected Market Size of the Global Aquaculture Products Market and Its Growth Rate?

The aquaculture products market is projected to experience robust growth, reaching \$46.48 billion by 2028, growing at a compound annual growth rate (CAGR) of 7.9%. This growth is driven by the expansion of aquaculture in emerging markets, innovations in aquatic farming technologies, increasing investments in sustainable practices, rising demand for high-protein diets,

the growth of offshore aquaculture, and government support for sustainable fishing. Key trends include greater automation in aquaculture, integrated fish farming, adoption of smart sensors in farms, eco-friendly equipment, AI-based fish health monitoring, and the growth of recirculating

aquaculture systems (RAS).
