

Enterprise SSD Market Type, Share, Size, Analysis, Trends, Demand and Outlook 2030

The global enterprise SSD market share is expected to witness considerable growth, owing to increase in demand for reliable, energy-efficient

Solid-state drive (SSD) or an electronic disk is a storage device that uses integrated circuit assemblies to store data. SSDs can be leveraged in enterprise storage to speed up the performance of data transfer without the help of additional servers. Unlike a mechanical hard drive, SSDs are intended with silicon memory chips with no moving parts. Enterprise flash drives such as SSDs are designed for assets requiring high operating performance, energy efficiency, reliability, and consistent performance. Furthermore, SSDs store data in interconnected microchip applications that make access to stored information faster by dramatically reducing the boot times. Moreover, surge in demand for high-end cloud computing solutions is expected to propel the demand for enterprise SSDs.

Rising demand from the high-end cloud segment across the globe and surge in adoption of data center applications drive the market growth. However, high cost and short service life of SSDs coupled with designed complexity restrain the market growth. On the contrary, rise in unstructured information with real-time analysis and increase in demand for SSD over HDD are projected to provide lucrative opportunities for the enterprise SSD industry during the forecast period.

According to enterprise SSD market trends, the storage segment was the highest contributor to

the market in 2020. By storage, the under 500 GB and 500GB to 3TB segments collectively accounted for around 91.3% market share in 2020. Surge in adoption of high-end cloud computing solutions in small & medium enterprises has led the growth of the under 500 GB segment.

The emergence of COVID-19 has significantly impacted the global enterprise SSD market growth. The delay caused for construction projects due to partial or complete lockdown in various regions has significantly reduced the demand for enterprise SSDs during the pandemic. However, rise in demand for high-end cloud computing from prime enterprise, owing to the implementation of work-from-home policy by the governments of several countries, which, in turn, is anticipated to offer remunerative opportunities for the expansion of the enterprise SSD market analysis post pandemic.

Region wise, North America holds a significant share in the global enterprise SSD market. The adoption of hybrid cloud technology at the large enterprises is expected to propel the market in this region. Moreover, surge in demand for datacenter across small & medium enterprises in North America is anticipated to boost the growth of the enterprise SSD market in this region.

Key Findings of the Study

- In 2020, the TLC segment accounted for the maximum revenue and is projected to grow at a notable CAGR of 10.9% during the forecast period.
- The SATA and SAS segments together accounted for around 84.6% of the enterprise SSD market share in 2020.
- North America contributed for the major share in enterprise SSDs market, accounting for more than 41.8% share in 2020.

OND ONDONE ORDER ORDER ORDER ORDER ORDER

- Figure out the market dynamics altogether.
- Inspect and scrutinize the competitive scenario and the future enterprise SSD landscape with the help of different strictures including Porter's five forces.
- Understand the impact of different government regulations throughout the global health crisis and evaluate the enterprise SSD condition in the tough time.
- Consider the portfolios of the protruding players functional in the market in consort with the thorough study of their products/services.
- Have a compact idea of the highest revenue generating segment.

The research operandi of the global enterprise SSD includes significant primary as well as secondary research. When the primary methodology encompasses widespread discussion with a plethora of valued participants, the secondary research involves a substantial amount of product/service descriptions. Furthermore, several government sites, industry bulletins, and press releases have also been properly examined to bring forth high-value industry insights.

000 000000 000000:

- Evaluation of market share for regional and country-level segments.
- Market analysis of top industry players.
- Strategic recommendations for new entrants.
- All mentioned segments, and regional market forecasts for the next 10 years.
- Market Trends (Drivers, Difficulties, Opportunities, Threats, Challenges, Investment Opportunities and Recommendations)
- Strategic recommendations in the main business segment of the market forecast.
- Competitive landscaping of major general trends.
- Company profiling with detailed strategy, financial and recent developments.
- Latest technological progress mapping supply chain trends.

The market study further promotes a sustainable market scenario on the basis of key product offerings. On the other hand, Porter's five forces analysis highlights the potency of buyers and suppliers to enable stakeholders make profit-oriented business decisions and strengthen their supplier-buyer network. The report provides an explicit global enterprise SSD breakdown and exemplifies how the opposition will take shape in the new few years to come. Rendering the top ten industry players functional in the market, the study emphasizes on the policies & approaches integrated by them to retain their foothold in the industry.

00000 00:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies, and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
