EINPresswire.com/ -- Blood Bank

Computer Systems, Inc. ([BBCS](#)) is proud to announce that [Coastal Bend Blood Center](#) (CBBC), a leading community blood center, is the first to implement the [ForLife™](#) Biologics Platform and Blood Bank Control System 6.1. This successful implementation marks a significant milestone in the industry, transforming how blood centers operate.

Transforming Blood Center Operations with ForLife™ Biologics Platform and Blood Bank Control System 6.0

Blood Bank Control System 6.1 serves as the core foundation of the ForLife™ Biologics Platform. This integration provides CBBC with a comprehensive, state-of-the-art solution to streamline operations, from monitoring donors and managing products and testing to the efficient distribution of lifesaving blood products. With decades of expertise in software development and blood banking, BBCS worked closely with CBBC's dedicated team to ensure a seamless transition from their legacy BBCS software systems. The implementation process involved configuration, training, integration, and continuous support, ensuring that CBBC can now operate more efficiently than ever before.

"We are incredibly excited to be the first to implement the ForLife™ Biologics Platform," said Corey Survant, CEO of Coastal Bend Blood Center. "This partnership with BBCS allows us to enhance our operations and provide the best possible service to our donors and patients. Their innovative technology aligns perfectly with our mission to save lives by delivering a safe and dependable blood supply to the communities we serve. By having a system that works in real-time, we have reformed the way we operate."

A Proud Milestone for BBCS

"Blood Bank Computer Systems (BBCS) is incredibly proud of this milestone achievement," said Brian Forbis, CEO of BBCS. "The successful implementation of ForLife™ at Coastal Bend Blood Center showcases our commitment to advancing the blood banking industry through innovation and collaboration. We are thankful to the entire implementation team for their hard work and dedication. Their efforts ensure that CBBC can continue providing essential services to the community more effectively."

About BBCS

For over 40 years, Blood Bank Computer Systems, Inc. has been at the forefront of software innovation in the blood and biologics industry. Our mission is to empower blood centers worldwide to save lives through dependable, innovative software solutions. We remain committed to supporting our clients by offering comprehensive software, training, and ongoing support to meet their evolving needs.
