Portable Mobility Scooters Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

The portable mobility scooters market has experienced significant growth in recent years. It is projected to expand from \$4.55 billion in 2023 to \$5.12 billion in 2024, reflecting a compound

annual growth rate (CAGR) of 12.4%. This growth in the past few years can be attributed to factors such as the rising elderly population, higher rates of disability, greater awareness of healthcare, an expanding range of distribution channels, and a growing availability of customizable scooter options.

The portable mobility scooters market size is expected to see rapid growth in the next few years. It will grow to \$8.22 billion in 2028 at a compound annual growth rate (CAGR) of 12.6%."

The Business Research Company

What Is the Estimated Growth Rate and Market Size of the [Global Portable Mobility Scooters Market?](#)

The portable mobility scooters market is projected to experience significant growth in the coming years, reaching \$8.22 billion by 2028, with a compound annual growth rate (CAGR) of 12.6%. This growth during the forecast period is

driven by factors such as government and private insurance initiatives, the expansion of product offerings, a focus on inclusive design, the rise of e-commerce, and the growth of rental services.

What Are The Significant Drivers Behind The Growth Of The Portable Mobility Scooters Market?
The increasing pollution levels are anticipated to drive the growth of the portable mobility scooter market in the coming years. Pollution refers to the presence of harmful environmental contaminants in air, water, or soil, often caused by industrial activities, urbanization, rising vehicle emissions, deforestation, and the use of harmful chemicals in agriculture and manufacturing. Portable mobility scooters contribute to reducing pollution by offering an eco-friendly mode of transportation that produces little to no emissions. This helps decrease reliance on cars, alleviates vehicle congestion, and lowers overall air pollution.
