

RefillGenie Offers Complimentary Blood Work Services for Comprehensive Care

Telehealth company expands services to include free blood work analysis for patients requiring medication refills.

JERSEY CITY, NJ, UNITED STATES,
November 15, 2024 /EINPresswire.com/

-- [RefillGenie](#), a pioneering telehealth company specializing in medication refills, announces the introduction of complimentary blood work orders to enhance patient care and safety.

Founded by physicians who witnessed the devastating consequences of patients running out of critical medications, RefillGenie has been committed to making healthcare more accessible and convenient. By providing a simple, text-based service, the company enables patients to refill their prescriptions quickly and easily, preventing complications from conditions such as diabetes and hypertension.

"At RefillGenie, patient safety is our top priority," says Dr. Stephen Kelly, Founder of RefillGenie. "In certain instances, we may advise patients to have blood work done before providing a refill. To ensure comprehensive care, we now offer lab orders and interpretation free of charge."

The complimentary blood work service is a testament to RefillGenie's dedication to patient well-being. By monitoring blood levels and providing expert interpretation, the company can make informed decisions about medication refills, ensuring optimal treatment outcomes.

RefillGenie's services are now available in 41 states across the United States, providing a lifeline to patients who may be on the road, between doctors or insurance plans, or facing unexpected life events. With a standard turnaround time of 12 hours, and most refills arriving even sooner, RefillGenie exceeds expectations in delivering timely and efficient care.

[Patients have praised RefillGenie](#) for its exceptional service and commitment to their health. Carla Sampson, a satisfied patient, shares, "Love RefillGenie! I am waiting to be put on insurance and they have saved my life, literally. I have to have my blood pressure meds and they made sure I do until I see my doctor again. Quick, courteous, affordable service. Would definitely use again."

Heather Coxe, another happy patient, adds, "Always timely and nonissues with prescription refills. Highly recommend when you need a refill fast."

Amy Dalton, a long-time user of RefillGenie, states, "I have used this service several months, and it is the easiest and smoothest process out there. Prescription refills usually called in within 2 hours. Wonderful service!"

While RefillGenie serves as a valuable resource during times of uncertainty, the company emphasizes the importance of re-establishing care with a local primary care provider for regular physical exams and long-term health management. RefillGenie's role is to bridge the gaps and ensure continuity of care when patients face challenges in accessing their medications.

RefillGenie is not an online pharmacy. It is a telehealth platform where customers can interact with a board-certified physician via encrypted text chat; if approved, the physician sends a prescription for a refill of an existing medication. Proof of a previous prescription is required. To learn more about RefillGenie's services, call +1 (929)-274-3052. ###

About RefillGenie

The physician founders of RefillGenie (<https://refillgenie.com/about-us/>) were tired of seeing patients suffer from strokes and heart attacks simply because they were unable to refill their blood pressure medication. For that reason, they created a simple, text-based service to ensure anyone can access their life-saving medications, even when in-between doctors or insurance plans.
