

# OPIC Technologies, Inc. Leaders of 3D Live, Connecting Deployed Service Members with Their Families Like Never Before

---

ORLANDO, FL, UNITED STATES, November 19, 2024 /EINPresswire.com/ -- OPIC Technologies, Inc., the global leader in 3D live technology, is proud to announce its latest groundbreaking application—bringing deployed military service members closer to their families through immersive, real-time 3D experiences. In an era where staying connected across long distances is more important than ever, OPIC's technology offers a revolutionary way for deployed personnel to maintain meaningful connections with their loved ones, bridging the gap created by miles of separation.

OPIC's state-of-the-art 3D live streaming technology allows families to interact in real time, providing an experience that goes far beyond traditional video calls. The immersive 3D environment makes it feel as though family members are in the same room, enabling deployed service members to share everyday moments, celebrations, and special milestones with loved ones back home.

"At OPIC, we are driven by a mission to connect people across the globe in ways that are meaningful and transformative," said Bob Douglas, CEO of OPIC Technologies, Inc. "We understand the challenges that military families face when separated by deployments. Our 3D live technology is designed to bridge that distance, allowing service members to feel present in the lives of their families even when they're thousands of miles away."

How OPIC's 3D Live Technology Enhances Connection for Military Families:

**Immersive Communication:** Unlike traditional video calls, OPIC's technology offers a fully immersive experience, allowing families to share moments in real time with depth and presence. The 3D experience makes it feel like families are truly together, even when they are separated by continents.

**Real-Time Interaction:** The platform allows families to interact as if they were in the same room. Whether it's sharing bedtime stories, attending family gatherings virtually, or even celebrating a birthday, OPIC's technology brings families closer together.

**Personalized Experiences:** Service members can use 3D live streaming to participate in family activities like virtual walks, school events, or simply spending quality time, making them feel

more involved in their loved ones' lives.

Supporting Mental Well-being: By providing a more intimate and realistic way to stay connected, OPIC's technology helps reduce feelings of isolation and homesickness for deployed personnel, positively impacting their mental well-being.

## The Future of Military Communications

OPIC Technologies is already in discussions with various branches of the military to integrate its 3D live technology into communications platforms used by deployed personnel. The goal is to provide service members with a more meaningful and immersive way to stay connected to their families, ultimately enhancing morale and improving the quality of life for those who serve.

"The ability to feel present with loved ones, even while deployed, is a game-changer," continued Bob Douglas. "We're honored to support the brave men and women who serve our country, and we're committed to using our technology to bring them closer to their families."

## About OPIC Technologies, Inc.

OPIC Technologies, Inc. is the global leader in 3D live technology, dedicated to creating immersive and interactive experiences that transform the way people connect. With applications spanning industries from gaming and entertainment to education and military communications, OPIC is committed to pushing the boundaries of what's possible in digital interaction. By harnessing the power of real-time 3D, OPIC is setting a new standard for how people stay connected, no matter the distance.
