

# Trident IoT Now Authorized as a Matter 1.4 Test Lab

CARLSBAD, CA, UNITED STATES,  
November 20, 2024 /

EINPresswire.com/ -- Trident IoT, a leading provider of IoT solutions, is proud to announce it has received authorization as a test lab for Matter 1.4 certifications. This recognition expands Trident IoT's comprehensive suite of testing services, which already includes capabilities for Z-Wave and Zigbee certifications.

This milestone reinforces Trident IoT's commitment to advancing interoperability in the smart home and IoT ecosystem. Matter 1.4, the latest iteration of the universal standard developed by the Connectivity Standards Alliance (CSA), enhances device compatibility, security, and performance across smart home platforms. Trident IoT's authorization as a test lab enables manufacturers to ensure their devices meet the rigorous standards of Matter certification, promoting seamless integration with other Matter-enabled products.

“

Becoming an authorized Matter 1.4 test lab, alongside our existing expertise in Z-Wave and Zigbee, underscores our dedication to supporting the broader industry with world-class testing services.”

*Mariusz Malkowski, Chief  
Technology Officer at Trident  
IoT*

“Becoming an authorized Matter 1.4 test lab, alongside our existing expertise in Z-Wave and Zigbee, underscores our dedication to supporting the broader industry with world-class testing services” said Mariusz Malkowski, Chief Technology Officer at Trident IoT.

“By locating our labs in the US, we make it easier for North

American developers to communicate throughout the certification process, resolving issues that arise quickly, resulting in products getting to market faster.”

Trident IoT's cutting-edge test facilities are equipped with the latest tools and expertise to support developers throughout the certification process. The company's multi-protocol certification capabilities streamline testing for manufacturers while ensuring compliance with

the most widely adopted smart home standards.

With Matter, Z-Wave, and Zigbee under one roof alongside our other engineering design and development services, Trident IoT is uniquely positioned to serve as a one-stop solution for manufacturers navigating the complexities of IoT product development and certification.
