

Johnson County Upgrades Facilities Operations with OpenGov

CLEBURNE, TX, UNITED STATES, November 25, 2024 /EINPresswire.com/ -- After facing challenges with manual work order management and a lack of asset tracking, Johnson County, TX leadership sought a solution to improve their facilities' operational efficiency. They found its answer in OpenGov, the leading provider of modern cloud solutions for local governments.

Located in the heart of Texas, Johnson County staff struggled with outdated software that couldn't connect to GIS, leaving staff to navigate facilities without proper mapping tools. They needed a solution that offered comprehensive asset tracking, streamlined work order assignments, and tools to support their growing population and infrastructure. [Cartegraph Asset Management](#), now part of the OpenGov Cloud, emerged as the ideal choice for its ability to integrate with GIS, provide robust tracking features, and offer the flexibility needed to manage current and future demands.

With the adoption of Cartegraph Asset Management, Johnson County leadership anticipates a significant transformation in its facilities operations. County staff will benefit from access to detailed facility maps and work histories, enabling them to complete tasks more efficiently while reducing time spent in manual meetings. Additionally, the ability to track labor, equipment, and materials will enhance budget planning and asset replacement strategies. These improvements are expected to streamline workflows and position the County for long-term success as its needs continue to grow.

The County joins more than 1,900 public sector organizations leveraging OpenGov to revolutionize work processes with cloud-based software designed specifically for the needs of government.

About OpenGov

OpenGov is the leader in modern cloud software for cities, counties, state agencies, and special districts. With a mission to power a more effective and accountable government, OpenGov serves more than 1,900 public sector leaders and their organizations. OpenGov is built exclusively for the unique budgeting and planning, accounting, permitting and licensing, procurement, asset management, and tax and revenue needs of the public sector. The OpenGov Cloud empowers organizations to operate more efficiently, adapt to change, and strengthen trust with the communities they serve. Learn more or request a demo at opengov.com.
