ECFX Becomes First and Only Provider to Deliver Automated Court Notice Processing Across All 50 States

Venice, California – ECFX, the leader in electronic court notice management for law firms, announces a historic milestone as the only provider to achieve automated processing of electronic court filing (ECF) notices across all 50 states. This coverage, combined with the recent launch of ECFX Track, the industry's most advanced case monitoring platform, sets ECFX apart as the only complete solution for court notice management and case monitoring on the market.

"Becoming the first and only provider to automate court notice processing in every state marks a watershed moment for both ECFX and the industry," says Dan O'Day, Co-Founder and CEO of ECFX. "Our commitment to meeting our clients' needs has driven us to build integrations not just in major legal markets, but truly everywhere our clients practice law. The addition of ECFX Track to our platform has been instrumental in achieving this comprehensive coverage, offering law firms a powerful combination of nationwide notice processing and sophisticated case monitoring capabilities."

This achievement spans state courts, federal courts, and administrative agencies, with ECFX supporting all Appellate, Bankruptcy, and District courts, as well as specialized venues like the Patent Trial and Appeal Board (PTAB), International Trade Commission (ITC), Federal Energy Regulatory Commission (FERC), and International Trade Administration (ITA). The platform's capability to handle multiple ECF service providers within individual states and counties ensures truly comprehensive coverage.

"Achieving national coverage while simultaneously launching ECFX Track demonstrates our commitment to streamlining the entire court notice workflow," says Nelson Quintero, Co-Founder and COO at ECFX. "This integrated approach is transforming how law firms manage their court notice processing and case tracking across jurisdictions."

Looking ahead, ECFX plans to leverage its nationwide infrastructure and enhanced monitoring capabilities to expand automated notice processing further. "While we're proud of this landmark achievement, this is just the beginning," added O'Day. " ECFX is positioned to scale with firms as they grow. With plans to expand even further, we're ensuring that firms adopting the platform today are also prepared for tomorrow's advancements in case tracking and court notice technology. These capabilities set a new benchmark for what law firms should expect from their court notice solution provider."

ECFX was founded by legal and technology experts with a single goal: to address unmet automation needs in the legal industry. It is committed to filling in gaps in legal workflows with intelligently automated solutions, enabling firms to save time, gain control, mitigate risk, and improve visibility. Its premier product, ECFX Notice, automates the downloading, profiling,

storing, and distribution of court documents in ECF notices for both State and Federal courts—saving firms hundreds of hours a week to focus on the work clients value. With the addition of ECFX Track, the company continues to innovate in providing comprehensive solutions for legal professionals across the United States.
