WebRezPro Unveils New Version for Today's Hospitality Innovators

WebRezPro v11 delivers powerful, reimagined features to save more time, drive more bookings, and maximize revenue for hoteliers.

CALGARY, AB, CANADA, November 20, 2024 /EINPresswire.com/ -- WebRezPro, a [leading cloud property management system](#) for independent hotels, inns, vacation rentals, hostels, and campgrounds, is proud to announce the release of its newest version of software. Version 11 (v11)

WebRezPro Property Management System

represents a significant upgrade with a redesigned user interface and meaningful feature updates, making it easier and more profitable than ever for lodging operators to manage their business.

> With v11, we are excited to offer the same powerful flexibility our software is known for in a more streamlined package"
> *Frank Verhagen, President*

This latest software release addresses the real-world demands of users, supported by robust, scalable backend technology that drives innovation in an evolving industry. The revamped property management system introduces a completely reimagined booking engine, a more powerful interactive tape chart, and faster guest check-ins and check-outs.

"We're proud to be recognized as a leading hospitality management platform for all types of properties. With v11, we are excited to offer the same powerful flexibility our software is known for in a more streamlined package," said Frank Verhagen, President and Founder of WebRezPro.

Key advantages of WebRezPro v11 include:
-Enhanced User Experience - A modernized user interface with improved navigation, additional shortcuts, more dashboard datak, and enhanced device compatibility simplifies onboarding, accelerates user adoption, and streamlines day-to-day tasks.

-Redesigned Booking Engine - The completely revamped booking engine drives direct revenue with more intuitive and flexible search capabilities, a modernized booking process, and a new online guest portal designed to increase loyalty.

-Optimized Reservation Management - Version 11 transforms reservation management with a new arrivals/departures/stayovers control panel, allowing operators to oversee existing bookings seamlessly from a single screen. From filtering and searching reservations to processing modifications, check-ins/outs, and payments, and sending guest emails, this exciting new feature makes managing reservations faster and more intuitive.

-Expanded Feature Set - From system setup to reservations to rate management, v11 introduces meaningful feature enhancements across the board—including an updated tape chart, rate calendar, reservation options, hourly bookings, customizable unit amenities, seasonal unit-type photos, and unit closeouts—boosting efficiency, flexibility, and productivity.

-Advanced Reporting Capabilities - Improved custom reports make data mining easier and more versatile than ever before.

-More Integrations - Version 11 supports over 150 direct integrations with leading hospitality software providers, empowering operators to build a robust and flexible tech stack tailored to their needs.

-Strengthened Data Protection - Updated security measures uphold industry-leading standards, ensuring optimal protection of hotel and guest data.

"Shaped by the needs and feedback of our customers, the new WebRezPro provides hoteliers with even more value through innovative, time-saving features that empower operators to work more effectively and profitably," said Verhagen.

WebRezPro v11 is now available to all current and new clients.

About WebRezPro
WebRezPro is a robust cloud-based property management system designed for independent lodging operators. The all-in-one solution streamlines operations, saving time and boosting revenue through features like online reservations, self check-in, guest payments, housekeeping management, accounting, and advanced reporting. With a commitment to user-friendly, scalable software, industry-best data protection, and exceptional support, WebRezPro enhances efficiency and guest satisfaction for over 2000 properties in 50 countries. Launched in 2003, WebRezPro is a product of World Web Technologies Inc., an internet marketing and software company serving tourism and hospitality since 1994. Learn more at webrezpro.com.
