

Horizon Below 75cm by Tsung Wei Yang Wins Bronze in A' Architecture Awards

Tsung Wei Yang's Innovative Infant Daycare Center Design Recognized with Esteemed A' Design Award in Architecture Category

COMO, CO, ITALY, November 20, 2024 /EINPresswire.com/ -- The A' Design Award, one of the world's most respected and well-recognized awards in the field of [architecture](#) design, has recently announced [Tsung Wei Yang](#) as a winner in the Architecture, Building and Structure Design category for the innovative work "Horizon Below 75cm." This prestigious recognition highlights the significance of Tsung Wei Yang's design within the architecture industry, positioning it as a notable example of excellence in the field.

Tsung Wei Yang's award-winning infant daycare center design addresses a critical need for adequate childcare facilities in rural areas, where such institutions are often lacking compared to urban centers. By prioritizing the establishment of a public daycare facility focused on infant care and parental education, this project holds great relevance for communities seeking to improve early childhood development support.

What sets "Horizon Below 75cm" apart is its meticulous attention to the varying sensory needs of children at different developmental stages. The design features precisely calibrated façade openings ranging from 45 to 75 cm in height, allowing infants and toddlers to engage with the outer world from their unique perspectives. This innovative approach demonstrates a keen understanding of the interplay between architecture and early childhood development.

The recognition bestowed by the A' Architecture, Building and Structure Design Award serves as

Horizon Below 75cm

a testament to Tsung Wei Yang's commitment to pushing the boundaries of design in service of the community. This accolade is expected to inspire the firm to continue exploring innovative solutions that prioritize the needs of children and families, potentially setting new standards for daycare center design in rural areas and beyond.

Project Members

Horizon Below 75cm was designed by a talented team including Tsung Wei Yang, who led the project, Ziling Wei, who contributed to the architectural planning, and Janmichael Antoni, who assisted with the design execution.

About Bronze A' Design Award

The Bronze A' Design Award recognizes outstanding designs that demonstrate a notable level of creativity and practicality in the field of Architecture, Building and Structure Design. This prestigious award acknowledges the skill and dedication of designers who create works that excel in areas such as innovative use of space, structural integrity, aesthetic appeal, environmental impact, functional efficiency, material selection, technological integration, social relevance, cultural sensitivity, and economic viability. Winning designs are selected through a rigorous blind peer-review process by an expert jury panel, ensuring that only the most deserving projects receive this esteemed recognition.

About A' Design Award

The A' Design Award is an international, juried design competition that has been recognizing and promoting superior architecture, building, and structure designs since 2008. Open to entries from all countries and organized across multiple industries, the A' Design Award provides a global platform for designers to showcase their visionary projects and gain well-deserved

recognition. The competition's ultimate aim is to make the world a better place by highlighting the transformative power of good design and its potential to positively impact society. Through a meticulous evaluation process conducted by an influential jury panel of design professionals, industry experts, journalists, and academics, the A' Design Award celebrates the remarkable achievements of creative minds, inspiring a global appreciation for the principles of exceptional design.
