Building Thermal Insulation Global Market Report
2024 - Market Size, Trends, And Global Forecast 2024-2033

The building thermal insulation market has experienced consistent growth in recent years, projected to rise from \$29.76 billion in 2023 to \$30.75 billion in 2024, with a compound annual growth rate (CAGR) of 3.3%. This growth can be attributed to various factors, including energy

efficiency regulations and building codes that boost insulation demand, heightened awareness of environmental sustainability and energy conservation, an expanding construction industry, fluctuations in energy prices, and government incentives promoting insulation use.

“

The building thermal insulation market size is expected to see steady growth in the next few years. It will grow to \$35.83 billion in 2028 at a compound annual growth rate (CAGR) of 3.9%.”

What Is the Expected Size of the [Global Building Thermal Insulation Market](#), and How Fast Will It Grow?

The building thermal insulation market is anticipated to experience steady growth, projected to reach \$35.83 billion by 2028, with a compound annual growth rate (CAGR) of 3.9%. This growth is driven by efforts to mitigate climate

change and the increasing demand for energy-efficient buildings, the adoption of green building certifications and standards, ongoing research and development of high-performance and sustainable insulation materials, and rising interest in passive house and zero-energy building designs, along with urbanization and population growth. Key trends during the forecast period

include the use of biodegradable and sustainable insulation materials, aerogel insulation, prefabricated insulation panels, high-performance insulation suitable for cold climates, and insulation solutions for aging buildings.

What Is Accelerating Growth in the Building Thermal Insulation Market?

The rising trend in constructing green buildings is anticipated to drive the growth of the building thermal insulation market in the future. Green buildings are designed to minimize or eliminate negative impacts on the climate and the environment throughout their design, construction, and operation. These structures are resource-efficient and enhance the quality of life. Thermal insulation is utilized in green building construction to improve energy efficiency and promote natural cooling within the buildings.

Who Are the Major Players Influencing the Building Thermal Insulation Market's Growth?

Key players in the market include Johns Manville, Saint-Gobain S.A., Baden Aniline and Soda Factory, Kingspan Group PLC, Owens Corning, Rockwool International A/S, GAF Materials Corporation, Guardian Building Products Inc., CertainTeed Corporation, Knauf Insulation, Armacell International S.A., Dow Inc., Huntsman Corporation, Cabot Corporation, Recticel NV, Paroc Group.

What Are the Latest Trends Influencing Building Thermal Insulation Market Size?

Technological advancement is a significant trend gaining traction in the building thermal insulation industry. Leading companies in this sector are prioritizing the introduction of innovative technologies to secure a competitive edge.

How Is The Global Building Thermal Insulation Market Segmented?

- 1) By Material: Foamed Plastic, Mineral Wool, Aerogels, Cellulose, Other Materials
- 2) By Product: Glass Wool, Mineral Wool, Expanded polystyrene (EPS), Extruded polystyrene (XPS), Other Products
- 3) By Application: Roof Insulation, Wall Insulation, Floor Insulation
- 4) By End Use: Residential, Commercial, Industrial

Geographical Insights: Asia-Pacific Leading The Building Thermal Insulation Market

Asia-Pacific was the largest region in the building thermal insulation market in 2023. The regions covered in the building thermal insulation report include Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

What Is The Definition Of The Building Thermal Insulation Market?

Building thermal insulation is designed to inhibit the transfer of heat between substances in thermal contact. This is measured by the thermal conductivity of the insulation, which is achieved using materials with low thermal conductivity.

[The Building Thermal Insulation Global Market Report 2024](#) from The Business Research Company includes the following key information:

- Market size data for both historical and future periods
- Analysis of both macro and microeconomic factors that have impacted the market over the past five years
- Regional market analysis covering Asia-Pacific, China, Western Europe, Eastern Europe, North America, the USA, South America, and the Middle East and Africa
- Country-specific market analysis for Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, the UK, and the USA.

Overview of the Global Building Thermal Insulation Market Report: Trends, Opportunities, Strategies, and More

The Building Thermal Insulation Global Market Report 2024 from The Business Research Company is an extensive resource that delivers insights into the building thermal insulation market size, building thermal insulation market drivers and trends, building thermal insulation global market major players, building thermal insulation competitors' revenues, building thermal insulation global market positioning, and building thermal insulation market growth across geographies. This report provides valuable in-depth insights into potential opportunities and strategies. Companies can utilize the information presented to target segments with the greatest growth potential.

What Services Does [The Business Research Company Offer?](#)

The Business Research Company has published more than 15,000 reports spanning 27 industries and over 60 regions. Our research is supported by 1.5 million datasets, thorough secondary research, and unique insights gained from interviews with industry experts. We offer ongoing and customized research services, featuring a variety of specialized packages designed

to meet your specific needs, such as Market Entry Research, Competitor Tracking, Supplier & Distributor Packages, and many others.

Our flagship product, the Global Market Model, serves as a leading market intelligence platform that provides comprehensive and updated forecasts to facilitate informed decision-making.
